SCREW LOADER

The Screw Loader is an advanced piece of equipment designed to provide a sanitary and efficient method of transferring products between locations, ideal for various industries requiring high hygiene standards. This loader features a unique screw mechanism that ensures a consistent and controlled flow of materials, minimizing product degradation and contamination risks.

The Screw Loader offers a reliable and hygienic solution for material transfer, with customizable features that make it a versatile choice for various industrial applications.

KEY FEATURE

One of the standout features of the Screw Loader is its customizable holding capacity. This

flexibility allows the loader to be tailored to specific applications, accommodating different volumes and types of products. Whether dealing with bulk powders, granules, or other materials, the loader's design can be adapted to suit the specific needs of the operation, ensuring optimal performance and efficiency.

CLEANING & SANITIZING

The Screw Loader is built with sanitary design principles in mind. Its construction materials and surface finishes are chosen to meet stringent hygiene requirements, making it suitable for use in industries where cleanliness is paramount. The loader's easy-to-clean design reduces downtime and maintenance costs, contributing to a more streamlined and productive operation.

STANDARD OPTIONS

- Quick release shaft seals
- Hinged covers with locks
- Mounted on casters or fixed placement
- All interior welds ground smooth
- Drip pan under discharge bearing
- Standard hopper capacities from 500lbs–10,000lbs
- Top agitator to prevent product bridging
- USDA acceptable

ADDITIONAL OPTIONS

- Variable speed (electric or hydraulic)
- 2 OR 3 point power pivot
- Lowering cylinders to facilitate cleaning
- Heavy duty flights (1/4"-1/2" thick)
- Staircase mounted to unit for sanitation
